

COPY OF THE JOB DESCRIPTION AND AD

Qualifications

- You must have experience of building well-managed solutions and processes, improving productivity, auditability, and governance of teams' work.
- You can lead the discovery phase of medium to large projects to produce high level design by partnering with the product management, project management, and business.
- Demonstrates curiosity and a growth mindset; fosters an environment that supports learning, innovation, and intelligent risk-taking.
- Contributes to an environment allowing everyone to bring their best selves to work, demonstrates engagement and commitment to the team.
- Bachelor's degree in Computer Science and 3 years' experience in software engineering or related field OR 5 years' experience in software.
- Master's degree in Computer Science or related field and 2 years' experience in software engineering or related field.

Responsibilities

- As a Senior Software Engineer on a team of data scientists and machine learning engineers, you will be the only full stack engineer supporting our experimental and modeling.
- You will provide support to the ML (Machine Learning) Engineers and Data Scientists, as well as business stakeholders and leadership.
- You can fully own, lead and organize your work from conception to delivery and maintenance, monitoring progress and results.
- Acts as an altruistic servant leader and is consistently humble, self-aware, honest, and transparent.
- Seeks and implements continuous improvements and encourages the team to leverage new digital tools and ways of working.
- Delivers expected business results while putting the customer first and consistently applying an omni-merchant mindset and the EDLP and EDLC business models to all plans.
- Adopts a holistic perspective that considers data, analytics, customer insights, and different parts of the business when making plans and shaping the team's strategy.
- Embraces diversity in all its forms and actively supports diversity of ideas and perspectives, as well as diversity goal programs.
- Builds strong and trusting relationships with team members and business partners; works collaboratively and cross-functionally to achieve objectives; and communicates with energy and positivity to motivate, influence, and inspire commitment and action.

newyork, CO, 80227-4621

Dear Mrs. SALMAN,

APPLICATION FOR THE POSITION OF SENIOR SOFTWARE ENGINEER

I am writing in response to your job posting indicating the company's need for a Senior Software Engineer. With my experience, educational background, and relevant skills in the field, I believe I might be the individual your company is looking for.

I know the field where I studied for a bachelor's degree in computer science and engineering, and I am currently pursuing a master's degree in Web development. I am also a quick learner, innovative, and self-driven individual with solid numeracy and problem-solving skills. I also gained experience in the field during my internships and volunteer. I am also well served with C++, C, Python, JavaScript, HTML, angular, springboot and CSS coding languages.

Your company is the most suitable in terms of interest. Its success in website development and working with you will give me further exposure, help me gain experience, and develop my skills towards becoming a competent website developer. I am very excited and interested in working with you.

I can be reached by phone at +1(475) 234-8493

or via e-mail at nrevanth1998@gmail.com

Thank you in advance for your consideration and time. I look forward to hearing from you.

Sincerely,

Revanth Nallamatti.
